

J Hanley

2-minute bio

An aerial photograph showing a coastal area with a large body of water, a marina with many sailboats, and a school building complex on a grassy hillside. A green box highlights a small white building on the hillside, and another green box highlights a redacted area on the hillside. A black callout box with the text 'Lawrence Cove National School' points to the school building complex.

AN INVESTIGATION

OF

THE LAWS OF THOUGHT,

ON WHICH ARE FOUNDED

THE MATHEMATICAL THEORIES OF LOGIC AND
PROBABILITIES.

BY

GEORGE BOOLE, LL. D.

PROFESSOR OF MATHEMATICS IN QUEEN'S COLLEGE, CORK.

PREFACE.

The following work is not a republication of a former work entitled, "The Mathematical Analysis of Logic." It is devoted to the same object, and it begins by establishing fundamental laws, but its methods are more general,

too highly valued or too lightly regarded to attach to the mere form of its exposition.

To his valued friend, the Rev. George Peacock, the Author desires to record his obligations for the assistance of this work, and for some important suggestions.
