Evolution of Epidemiologic Ideas: Annotated Readings on Concepts and Methods

Edited by
Sander Greenland
Division of Epidemiology
University of California School of Public Health
Los Angeles, California

Epidemiology Resources Inc.

Table of Contents

Preface	v
Editor's Acknowledgments	vii
Publisher's Acknowledgments	ix
Part I—Issues in Causal Inference	
1. Observation and Experiment Austin Bradford Hill, 1953	2
2. Statistical Relationships and Proof in Medicine Jerome Cornfield, 1954	10
3. The Environment and Disease: Association or Causation? Austin Bradford Hill, 1965	14
4. "On the Methodology of Investigations of Etiologic Factors in Chronic Disease"—Further Comments Philip E. Sartwell, 1960	21
5. Causes and Entities of Disease Brian MacMahon and Thomas F. Pugh, 1967	25
6. Confounding and Effect Modification Olli Miettinen, 1974	34
7. Causes Kenneth J. Rothman, 1976	39
8. A Series of Exchanges on Popperian Philosophy in Epidemiology	46
Popper's Philosophy for Epidemiologists Carol Buck, 1975	47
Replies by:	
A. Michael Davies	57
Alwyn Smith	59
Andrew Creese	61
Richard Peto	63
Carol Buck	63
Against Popperized Epidemiology M. Jacobsen, 1976	65
9. Judgment and Causal Inference: Criteria in Epidemiologic Studies Mervyn Susser, 1977	68
Part II—Developments In Theory and Quantitative Methods	
1. Limitations of the Application of Fourfold Table Analysis to Hospital Data Joseph Berkson, 1946	86
2. A Method of Estimating Comparative Rates from Clinical Data Jerome Cornfield, 1951	94
3. The Interpretation of Interaction in Contingency Tables E. H. Simpson, 1951	102

4. On Estimating the Relation Between Blood Group and Disease Barnet Woolf, 1955	107
5. Statistical Aspects of the Analysis of Data from Retrospective Studies of Disease Nathan Mantel and William Haenszel, 1959.....	111
6. Components of the Crude Risk Ratio Olli S. Miettinen, 1972.....	142
7. Joint Dependence of Risk of Coronary Heart Disease on Serum Cholesterol and Systolic Blood Pressure Jerome Cornfield, 1962	148
8. Hazards in the Use of the Logistic Function Tavia Gordon, 1974.....	153
9. Dynamic Risk Analysis in Retrospective Matched Pair Studies of Disease Paul R. Sheehe, 1962	160
10. Estimability and Estimation in Case-Referent Studies Olli Miettinen, 1976	180
