Learning Objectives

• Discuss the underlying biological rationale for different treatments for patients with metastatic castration-resistant prostate cancer (mCRPC) and their utility in different treatment settings
• Define specific clinical criteria to enable appropriate treatment selection for their patients with mCRPC, based on analysis of the most up to date clinical trials data
• Outline current issues around resistance and other aspects of treatment optimization that may have an impact on future treatment paradigms

This event is approved for up to 1 credit by the Office for Continuing Professional Development. The Office for CPD, Faculty of Medicine, McGill University is fully accredited by the Committee on Accreditation of Canadian Medical Education (CACME). This event is an Accredited Group Learning Activity as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada. Through an agreement between the Royal College of Physicians and Surgeons of Canada and the American Medical Association, physicians may convert Royal College MOC credits to AMA PRA Category 1 Credits™. Information on the process to convert Royal College MOC credit to AMA credit can be found at www.amaassn.org/go/internationalcme. Each physician should claim only credit commensurate with the extent of their participation in the activity.
